

DISCHARGE SUMMARY

Patient Name: John Smith
Age: 62
Sex: Male
Date of Discharge: 2026-07-12

Diagnosis: Community-acquired pneumonia, right lower lobe

The patient was admitted with a 5-day history of productive cough, fever (38.7°C), and progressive shortness of breath. Chest X-ray on admission revealed consolidation in the right lower lobe consistent with pneumonia. Blood cultures were negative. The patient was treated with IV ceftriaxone and azithromycin for 5 days, then transitioned to oral amoxicillin-clavulanate.

Vitals on Discharge:

Blood Pressure: 128/78 mmHg
Heart Rate: 76 bpm
Temperature: 36.8°C
SpO2: 97% on room air

Medications on Discharge:

1. Amoxicillin-clavulanate 875/125 mg PO BID x 5 days
2. Acetaminophen 500 mg PRN for pain/fever
3. Continue home medications (atorvastatin 40 mg daily, lisinopril 10 mg daily)

Follow-up: Pulmonology clinic in 2 weeks. Repeat chest X-ray in 6 weeks.
